Reading Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP reading scale indicate how well students at lower, middle, and higher levels of the distribution performed.
\# The estimate rounds to zero.

* Significantly different from 2005.
$\uparrow$ Significantly higher than 2003. $\downarrow$ Significantly lower than 2003
(higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities ( $5 \%$ nationally in 2005) and English language learners ( $2 \%$ nationally in 2005 ) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
2 "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.
NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassifed" category for race/ethnicity are not displayed.
